MindBridge®

# Anomaly & risk discovery for financial integrity

Empowering audit, compliance and financial professionals with easy to use innovative technology

Who is MindBridge?

Financial integrity is the cornerstone of your organization. Efficiency, growth, and investment all hinge on the accuracy and quality of your numbers. The challenge is ensuring exactly that and communicating the work in a way that everyone can understand.

MindBridge is a global leader in financial risk discovery and anomaly detection that delivers a better way to work by identifying, surfacing, and analyzing risk across broad financial and operational datasets.

The product combines audit and finance expertise with data science and AI ingenuity to support professional judgment and serve the human need for financial and operational transparency.

MindBridge's patented product uses a unique set of anomaly detection and exposure techniques to build trust in your numbers and reduce uncertainty by providing key insights into your data.

As the volume and variety of data grows, MindBridge is the only solution that can scale for hundreds of millions of transactions with greater analytics performance and responsiveness, turning data into useful information for quicker decision making.
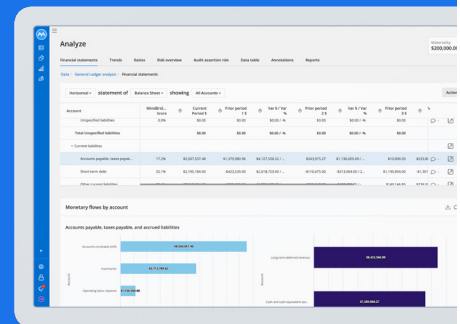

The value of MindBridge

MindBridge is an AI-powered risk discovery product designed for auditors, compliance and financial professionals and used by Fortune 500 companies and top CPA firms.

With MindBridge you can achieve the following outcomes:

- Data driven analytics that provide the most effective and highest quality insights, enabling you to focus on critical business issues.

- Over 100x increased likelihood of identifying errors and potential fraud by analyzing 100% of your data with AI and Machine Learning, as well as statistical methods and traditional rules.

- Reduced costs, achieved compliance, and improved allocation of resources and planning while mitigating areas of higher risk.

- Attract, retain, and empower talent with innovative tools that yield increased efficiency and productivity while providing more rewarding, fulfilling, and value-added contributions to department goals & overall organizational strategy.

MindBridge is recognized globally

MindBridge provides trusted and transparent anomaly detection empowering you to aggregate and risk score more data than you ever thought possible.
How does it work?

The world's most advanced AI–powered anomaly and risk discovery product for audit, compliance and financial professionals

With the MindBridge product, your team can test 100% of transactions and become more efficient at spotting anomalies and understanding their risks.

The product uses business rules, statistical models, and machine learning to automatically score risks across all transactions in a data set. It then displays results in an intuitive, audit–centric dashboard.

With a confident, complete view into their data business professionals are empowered to make better, more informed decisions.

Anomaly & risk analytics for your lifestyle

- SaaS/Cloud Agile Delivery
- AI–driven Automated Analysis
- Audited, Reliable, and Explainable Algorithms
- Advanced Intelligence for Greater Insights
- Rapid Risk Scoring and Relevance
- Flexible Data Integration and Deployment
- API for Automation and Systems Integration

MindBridge assesses risks that can bypass controls

MindBridge is recognized by the World Economic Forum as a Technology Pioneer, and by Forbes as a Top 50 AI Firm to Watch for its contribution to transforming accounting and financial professionals' ability to analyze data.

Our technology was the first to receive a comprehensive audit and green status by UCLC (University College of London), world leading experts and renowned center of excellence for algorithm audit and safety. This audit demonstrates that MindBridge's AI algorithms operate as expected, and we are commitment to transparency in building explainable, credible artificial intelligence.

MindBridge was the first audit and financial analysis software tool to have gone through the rigorous evaluation methodology of the ICAEW Technology Accreditation Scheme, and is the first private sector signatory to the Montreal Declaration for a Responsible Development of Artificial Intelligence.
